

Table 7. Geographic distribution of endpoints based on effective top-level domains plus one (eTLD+1) by marketplace. The *Skills* column reports the relative number of skills that contact at least one eTLD+1 associated with the respective country. The values do not sum to 100% because a single skill can contact domains located in multiple countries. In contrast, the *eTLD+1* column reports the proportion relative to the total number of discovered eTLD+1 domains in the marketplace.
